<b>Office Action Summary</b>	<b>Application No.</b> 10/661,698	<b>Applicant(s)</b> FAIRCLOTH ET AL.	
	<b>Examiner</b> Fredrick C Conley	<b>Art Unit</b> 3673	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 12 September 2003.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-25 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 25 is/are allowed.
- 6) ☒ Claim(s) 1,2,4-6,8-11,14,15,18,19,23 and 24 is/are rejected.
- 7) ☒ Claim(s) 3,7,12,13,16,17 and 20-22 is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

***Claim Objections***

Claim 15 recites the limitation "said first and second surface". There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 9-11, and 15-17 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Pat. No. 6,038,719 to Castagna.

Claim 1, Castagna discloses an assembly with at least one item, comprising:

a cushioning member 11, said cushioning member including a cushioning medium, a front surface and a back surface, said front surface and said back surface being connected along an outer perimeter of said cushioning member, said cushioning medium being between said front surface and said back surface;

a first cavity 18, said first cavity recessed from said front surface into said cushioning member, said first cavity having a first cavity opening, a first cavity sidewall perimeter surface and a first cavity floor surface, said first cavity sidewall perimeter surface connected to said first cavity floor surface, and said first cavity sidewall perimeter surface encircled by said cushioning member (col. 4 lines 6-15);

at least one item 20 removeably situated in said first cavity;

a first door 22 connected to said front surface, and said first door openable to

Art Unit: 3673

an open position for revealing at least a portion of said first cavity and closeable to a closed position over said first cavity for concealing said at least a portion of said first cavity and said at least one item situated in said first cavity; and wherein at least one of said cushioning member and said first door have indicia, said at least one item and said indicia together visually indicating an illustrated theme (col. 2 lines 45-48).

Claim 2, wherein said at least one item includes a stuffed toy (col. 5 lines 1-3).

Claim 9, further including a securing means (col. 4 lines 38-48) for securing said first door in said closed position, and wherein said first door is pivotally connected to said front surface.

Claim 10, further comprising a second door 24 connected to the cushioning member (col. 4 lines 44-45).

Claim 11, wherein said first door 22 and said second door 24 conceal said first cavity when said first door and second door are in the closed position.

Claim 15, wherein said cushioning member includes an outer perimeter surface, said outer perimeter surface connected to an outer perimeter of said first surface and connected to said second surface, said outer perimeter surface providing depth to said cushioning member.

Claim 16, further comprising a second cavity (fig. 14-15), said second cavity inherently having a second cavity perimeter sidewall surface which generally encircles a three dimensional void of said second cavity, said second cavity generally encircled by said cushioning medium.

Art Unit: 3673

Claim 17, wherein said second cavity is in said outer perimeter surface and extending in an inward direction between said front surface and said back surface.

Claim 23 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Pat. No. 4,824,059 to Butler.

Claim 23, Butler discloses an article for removeably receiving an item 14, comprising:

- a first surface having an outer perimeter;

- a second surface connected to said first surface at said outer perimeter;

- a cushioning medium, said cushioning medium located between said first surface and said second surface;

- a first cavity (16b), said first cavity being a three dimensional void encircled by said cushioning medium and being generally encircled by said first surface, said first surface including a front surface, a first cavity sidewall perimeter surface and a first cavity floor surface, said first cavity sidewall perimeter surface and said first cavity floor surface generally defining said three dimensional void, said first cavity sidewall perimeter surface billowing toward said three dimensional void for snugly holding yet removeably receiving the item, an opening to said first cavity being encircled by said front surface; and,

- a first door 50, said first door connected to said first surface and openable to an open position and closeable to a closed position, said first door overlaying said first cavity in said closed position.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Pat. No. 6,038,719 to Castagna.

Regarding claim 18, Castagna discloses all of the Applicant's claimed limitations except for having a second door. It would have been obvious to one having ordinary skill in the art at the time of the invention to connect a second door to the cushion in order to selectively access items stored in the second cavity.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Pat. No. 6,038,719 to Castagna in view of U.S. Pat. No. 5,819,346 to Lane.

Regarding claim 4, Castagna discloses all of the Applicant's claimed limitations except for having a sound device. Land discloses a sound device for a cushioned member (col. 20-21). It would have been obvious to one having ordinary skill in the art at the time of the invention to connect a sound device to the cushion in order for the user to select their own music.

Art Unit: 3673

Claims 1, 5-6, 8, 14-15, and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Pat. No. 4,824,059 to Butler in view of U.S. Pat. No. 4,768,245 to Dutton.

Claim 1, Butler discloses an assembly with at least one item, comprising:

a cushioning member 12, said cushioning member including a cushioning medium, a front surface and a back surface, said front surface and said back surface being connected along an outer perimeter of said cushioning member, said cushioning medium being between said front surface and said back surface;

a first cavity (16b), said first cavity recessed from said front surface into said cushioning member, said first cavity having a first cavity opening, a first cavity sidewall perimeter surface and a first cavity floor surface, said first cavity sidewall perimeter surface connected to said first cavity floor surface, and said first cavity sidewall perimeter surface encircled by said cushioning member;

at least one item 14 removeably situated in said first cavity;

a first door 50 connected to said front surface, and said first door openable to an open position for revealing at least a portion of said first cavity and closeable to a closed position over said first cavity for concealing said at least a portion of said first cavity and said at least one item situated in said first cavity. Butler fails to disclose indicia on the first door. Dutton discloses a cushion member having indicia on the outer surface (col. 2 lines 57-66). It would have been obvious to one having ordinary skill in the art at the time of the invention to employ indicia as taught by Dutton

on the outer surface of the door of Butler in order to provide a means to relate to the remote control devices stored therein.

Claim 5, wherein said first cavity opening has a circumference and where said first door has a larger circumference than said first cavity opening circumference so to overlay a portion of said front surface (fig. 5)(Butler).

Claim 6, wherein said outer perimeter of said cushioning member has a generally rectangular outline, said outline encircling a cushioning member frontal area, said first cavity opening encircling an opening area, and where said opening area is at least 18% of the size of said cushioning member frontal area (fig. 5)(Butler).

Claim 8, wherein said first cavity floor surface is attached proximate to said back surface for preventing said first cavity sidewall perimeter surface and said first cavity floor surface from turning inside out (fig. 3)(Butler).

Claim 14, wherein said outer perimeter of said cushioning member has an outline that is shaped to further visually indicate said illustrated theme (Butler).

Claim 15, wherein said cushioning member includes an outer perimeter surface, said outer perimeter surface connected to an outer perimeter of said first surface and connected to said second surface, said outer perimeter surface providing depth to said cushioning member (Butler).

Claim 19, further comprising a tunnel 34b, said tunnel having a tunnel opening in said first cavity sidewall perimeter surface, and said tunnel being a passageway located in between said front surface and said back surface (Butler).

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Pat. No. 4,824,059 to Butler in view of U.S. Pat. No. 4,768,245 to Dutton and U.S. Pat. No. 6,038,719 to Castagna.

Claim 9, Butler discloses all of the Applicant's claimed limitations except for a securing means for securing the first door. Castagna discloses a cushion member having a door 22 including a securing means (col. 4 lines 38-48). It would have been obvious to one having ordinary skill in the art at the time of the invention to employ a securing means on the first door of Butler as taught by Castagna in order to securely fix the door into the closed position.

***Allowable Subject Matter***

Claims 3, 7, 12-13, 16-17 and 20-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 25 is allowed.

Art Unit: 3673

**Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fredrick C Conley whose telephone number is 308-7468. The examiner can normally be reached on m-th m-fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather Shackelford can be reached on 308-2978. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
